PROFILE SUMMARY

Data Analyst skilled in **Python, SQL, Machine Learning, Data Visualization, and Predictive Analytics**. Experienced in building analytical dashboards, extracting actionable insights, performing KPI analysis, and developing data-driven solutions to support business decision-making workflows.

EDUCATION

B.E. Computer Science & Engineering (Hons – AI & ML) May 2026(Expected)
Chandigarh University, Punjab GPA: 8.56(Current)

EXPERIENCE

Machine Learning Intern – Future Interns(Remote) Jun 2025 – Jul 2025

- Built a **Customer Churn Prediction System** using Scikit-learn, Pandas, and feature engineering techniques.
- Performed exploratory data analysis, preprocessing, and trend analysis on customer datasets for predictive modeling workflows.
- Developed a **Streamlit dashboard** to visualize customer retention insights, KPI metrics, and prediction analytics.
- Automated AI-driven reporting workflows using OpenRouter API integration.

PROJECTS

AI Interview Screener (LLM-Powered Platform) 2026
Python, FastAPI, React, NLP, Data Analytics

- Built an analytics-driven interview evaluation platform generating structured candidate performance metrics.
- Processed interview responses to evaluate communication, confidence, and response quality using LLM pipelines.
- Designed automated scoring workflows and visualization-ready evaluation outputs for performance analysis.

Hybrid CCDA to FHIR Converter (Healthcare AI) 2025
Python, XML, NLP, FHIR, Data Processing

- Processed and transformed structured healthcare datasets into WHO-compliant FHIR resources.
- Implemented healthcare data normalization and ontology mapping using **SNOMED CT** and **LOINC**.
- Built modular validation workflows for semantic healthcare data analysis and interoperability.

Customer Churn Prediction System 2025
Python, Pandas, Scikit-learn, Streamlit, SQL

- Built predictive models to identify high-risk customers using classification algorithms and feature analysis.
- Performed data cleaning, preprocessing, customer segmentation, and trend analysis on structured datasets.
- Developed interactive dashboards for KPI visualization, retention monitoring, and business insight generation.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript

Data Analytics: Pandas, NumPy, Scikit-learn, Data Cleaning, EDA, Feature Engineering

Visualization: Streamlit, Matplotlib, Seaborn, Dashboard Development

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Docker, Jupyter Notebook, VS Code

Core Concepts: Statistics, Predictive Analytics, KPI Analysis, Business Intelligence

ACHIEVEMENTS AND LEADERSHIP

- Secretary – University Technical Club; organized hackathons, coding events, and technical workshops.
- Training and Placement Student Representative; coordinated placement activities and peer mentoring sessions.
