## PROFILE SUMMARY

Software Engineer skilled in **Python, JavaScript, React, FastAPI, SQL, and REST APIs**. Experienced in building scalable backend systems, responsive web applications, AI-powered platforms, and modular software solutions with production-ready deployment workflows.

## EDUCATION

**B.E. Computer Science & Engineering (Hons – AI & ML)**

Chandigarh University, Punjab

May 2026(Expected)

GPA: 8.56(Current)

## EXPERIENCE

**Machine Learning Intern – Future Interns(Remote)**

Jun 2025 – Jul 2025

- Developed scalable backend workflows for a **Customer Churn Prediction System** using Python and ML pipelines.
- Built interactive dashboard applications and integrated API-driven prediction workflows.
- Optimized preprocessing and inference pipelines for improved application responsiveness and maintainability.

## PROJECTS

**AI Interview Screener (LLM-Powered Platform)**

2026

*Python, FastAPI, React, Docker, REST APIs*

- Architected a scalable full-stack interview platform with modular **React frontend** and **FastAPI backend**.
- Developed REST APIs for interview evaluation, response processing, and AI-driven scoring workflows.
- Implemented responsive voice/text interaction systems and modular backend services for scalable deployment.
- Containerized frontend and backend applications using Docker for production-ready workflows.

**Hybrid CCDA to FHIR Converter (Healthcare AI)**

2025

*Python, XML, NLP, FHIR, Data Processing*

- Built modular healthcare data processing pipelines converting CCDA documents into standardized FHIR resources.
- Implemented ontology mapping and semantic validation workflows using SNOMED CT and LOINC standards.
- Developed reusable parsers and structured conversion workflows for scalable healthcare interoperability systems.

**Portfolio Website**

2025

*HTML, CSS, JavaScript*

- Designed and developed a responsive portfolio website with modern UI components and interactive navigation.
- Implemented project showcases, resume integration, animations, and mobile-responsive layouts.
- Optimized frontend performance and accessibility across multiple screen sizes and browsers.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, Java, SQL, C/C++

**Frontend:** HTML, CSS, JavaScript, React, Responsive UI Design

**Backend:** FastAPI, Flask, Django, REST APIs, Streamlit

**Databases:** PostgreSQL, MySQL, MongoDB

**Tools:** Git, GitHub, Docker, Postman, Railway, VS Code

**Core Concepts:** OOP, DSA, Full Stack Development, CI/CD, System Design

## ACHIEVEMENTS AND LEADERSHIP

- Secretary – University Technical Club; organized hackathons, technical workshops, and coding events.
- Training and Placement Student Representative; coordinated placement activities and peer mentoring sessions.
